You can view my very simple solution to the same problem:

[http://www.ultimatepp.org/forum/index.php?t=msg&th=5394&start=0&](http://www.ultimatepp.org/forum/index.php?t=msg&th=5394&start=0)

I did not abstract it into something usable but if you just have one or two files to upload, it may work. If anyone is interested, I'll work on making maybe a postdata class that will build the multipart form data.

Jeremy
