I would use `int GetCount() const`

```
{  
    if(typeid(T5) != typeid(Null)) return 5;  
    if(typeid(T4) != typeid(Null)) return 4;  
    if(typeid(T3) != typeid(Null)) return 3;  
    return 2;  
}
```

That works even for the dumb user
