I have UPP 2467, windows 7 and sdk 7.0
I downloaded the above file "gif.7z" and rebuilt all the "ImageView" sample however:
1. Yes now the gif files display
2. BUT they are NOT animated

by NOT animated I mean that ImageView will display the gif file, but the SAME gif file is animated
in the browser (IE, FireFox, etc)

For testing purposes you can use any of the "Smiley Shortcut" gifs
I used icon_redface.gif

Is there a newer version of the plugin available?
