klrkt wrote on Sun, 22 August 2010 22:43I have UPP 2467, windows 7 and sdk 7.0
I downloaded the above file "gif.7z" and rebuilt all the "ImageView" sample however:
1. Yes now the gif files display
2. BUT they are NOT animated

by NOT animated I mean that ImageView will display the gif file, but the SAME gif file is animated in the browser (IE, FireFox, etc)

For testing purposes you can use any of the "Smiley Shortcut" gifs
I used icon_redface.gif

Is there a newer version of the plugin available?
Hello klrkt

I had left this waiting this post to be solved
http://www.ultimatepp.org/forum/index.php?t=msg&goto=280 35&

In fact it is not directly related

Now plugin/Gif supports animated gifs... but do not play them.

I will post it in few time.
