How can you show which option is active?

It looks like there is a check box before each option, could an X be placed there?

Or remove the box and have the option highlighted or bold, preferred as it takes less space?

This is the code I am using:

```
void SettingsMenu(Bar& bar) {  
    bar.Add("m meters", THISBACK(Setm));  
    bar.Add("km kilometers", THISBACK(Setkm));  
    bar.Add("ft feet", THISBACK(Setft));  
    bar.Add("mi miles", THISBACK(Setmi));  
    bar.Add("nmi naut mi", THISBACK(Setnmi));  
}
```
