prof wrote on Thu, 27 April 2006 21:07 Talking about the widgets, they look ugly for me.

I strongly disagree with you. Some widget could be improved, but their general appearance is excellent. Please have a look at this page , <http://free-soft.org/guitool/> , to see what there is around. I've seen all of them and U++ has one of the best set of widgets.

Luigi
