Hello All,

I try compile ide with lpbuid.

When compile I have error:

...

Compiling Core/Cpu.cpp (flags DARWIN GCC GUI POSIX SHARED) ...

uppsrc/Core/Cpu.cpp: In function 'void Upp::sCheckCPU()':

uppsrc/Core/Cpu.cpp:40: error: PIC register '%ebx' clobbered in 'asm'

make[1]: *** [_out/Core/DARWIN_GCC_GUI_POSIX_SHARED/Cpu.o] Error 1

make: [ide] Error 2 (ignored)

Everything done.

and

...

Compiling Core/Mt.cpp (flags DARWIN GCC GUI MT POSIX SHARED) ...

uppsrc/Core/Mt.cpp:75: error: thread-local storage not supported for this target

make[1]: *** [_out/Core/DARWIN_GCC_GUI_MT_POSIX_SHARED/Mt.o] Error 1

make: [ide] Error 2 (ignored)

Everything done.

how fix it?
