See this post.

(Edit by fudadmin: url removed, topics merged.)

Disable the close button

```
EnableMenuItem( GetSystemMenu( hWnd, 0 ), SC_CLOSE, MF_BYCOMMAND  
|MF_DISABLED );
```

Remove the close button (I think).

```
HMENU hMenu = GetSystemMenu( hWnd, 0 );  
int nNbItems = GetMenuItemCount(hMenu);  
RemoveMenu(hMenu, nNbItems - 1, MF_BYPOSITION);  
RemoveMenu(hMenu, nNbItems - 2, MF_BYPOSITION);
```

And handle WM_SYSCOMMAND (SC_CLOSE) if you want also to disable [Alt]+[F4]
