Now LocalProcess::Read(String& res) function in Windows includes this in LocalProcess.cpp line 341:

 res.Cat(buffer, n);
It should be replaced with this:

 res.Cat(FromSystemCharset(buffer), n);

This way accents and other chars are not lost.

Should not it rather be

res = FromSystemCharset(String(buffer, n)))

?!

Frankly, we are perhaps missing FromSystemCharser(const char *, int count) variant here, I guess...
Hello Mirek

For me Cat was good but really you have a finer grain view.

However you are right. It seems FromSystemCharser(const char *, int count) would be the best option.
