cbpporter wrote on Thu, 09 September 2010 13:22I knew that I need to clean my packages. A newbie would probably waste a lot of time or even give up on this beast called C++.  
Is this clean you talk of same as the 'Build->Clean' or maybe 'Build->Clean Package' option or is it similar to tidying up the code you wrote?

If it is the first type, then wouldn't a Build->Rebuild all do the same? Surely - being a newbie can expose you to the vagaries of the language - scary
