Subject: IdCtrls Feature Request
Posted by zsolt on Mon, 13 Sep 2010 08:54:42 GMT

Until today I used SqlCtrls for editing ArrayCtrl rows with a dialog, but I found IdCtrls class. It is much better as SqlCtrls is not for this. The only missing feature is the Reset() method.

Could you add it to IdCtrls?

```
void      Reset()                  { item.Clear(); }
```
