Hello unodgs

Using Serialize with GridCtrl I get an exception the first time the app. is opened.

The reason is that in GridCtrl::Serialize() function, there is this:

```
else
{
  int tc;
  s % tc;
  for(int i = 1; i < tc; i++)
  {
    //String alias;
    //s % alias;
    //int n = aliases.Find(alias);
    int id;
    s % id;
    //if(id >= 0 && id < total_cols)
    s % hitems[id];
  }
}
```

As the first time, id value is undefined so I get an exception in `s % hitems[id];`.

Uncommenting line `//if(id >= 0 && id < total_cols)`, the problem is solved.
