Hello unodgs

Using Serialize with GridCtrl I get an exception the first time the app. is opened.

The reason is that in GridCtrl::Serialize() function, there is this:

```
else
{
int tc;
s % tc;
for(int i = 1; i < tc; i++)
{
//String alias;
//s % alias;
//int n = aliases.Find(alias);
int id;
s % id;
//if(id >= 0 && id < total_cols)
s % hitems[id];
}
}
```

As the first time, id value is undefined so I get an exception in s % hitems[id];.

Uncommenting line //if(id >= 0 && id < total_cols), the problem is solved.
