chrisadam2 wrote on Wed, 15 September 2010 13:06At last, I compiled my dll in MSVC, and link it correctly in MSVC. While debug, I really got some memory error, and steped into the dll-codes. But while the dll compiled in mingw, it would not step into the actual dll code, and just throw a 'Runtime Error'.

Hello ChisAdam

Have you tried to debug your application compiling it static?
