No way!!!!

Link please!

Is it 3D Dwarf?

I'm interested because I'm working on my own Dwarf Fortress inspired project. Are you involved with DF community/development?
Mine was much better than that

I'm the author of VisualFortress. SourceForge page.

The last version it officially worked with was DF 0.28.181.40d and I've stopped developing it. I'm not really playing DF any more, though I will again someday, and have moved onto other projects. Development of MediaPortal 2 is my current time-sink.

I just went back to the forum for the first time in a long time and my original thread is now 89 pages long and still on the second page! There are some nice screenshots on this page and there are hundreds more in the thread.
