BTW - does Linux OS support drag & drop?

Graeme

<http://doc.trolltech.com/3.3/qdropevent.html>

Do you think qt provides this only for Windows?

and Fox-toolkit:

```
SEL_DND_ENTER,           // Drag action entering potential drop target
SEL_DND_LEAVE,           // Drag action leaving potential drop target
SEL_DND_DROP,            // Drop on drop target
SEL_DND_MOTION,          // Drag position changed over potential drop target
SEL_DND_REQUEST,         // Inquire drag and drop data
```
