ratah wrote on Fri, 17 September 2010 16:28Hi everybody,

I always use this Library to create MS Excel file in C++.
Now i use upp and prefer Fonction4U/OfficeAutomation instead of this library.

Furthermore, some functions are not yet implemented like Setpic "add pictures into excel document". It is present in this library if upp programmers can introduce it into the OfficeAutomation library.

Thank you very much

Ratah

Hello Ratah

Oh!. You have included the Ole automation code ... what a pain! .

Thank you for your proposal. It would be great if you could also adapt the code you need to OfficeAutomation design (you would be included in the OfficeAutomation credits).
