Um, well no, I've never seem Winamp but I remembered Windows media player has a weird shape in skins mode ... so I looked up "nonrectangular windows"

<http://www.xploiter.com/programming/c/borland/2927.html>

where you create an elliptic region. I do not know how you would convert a bitmap into an elliptic region.

Graeme

I know quite well how to make those things with Windows API. But I was just wondering if Ultimate++ has these kind of cross-platform capabilities like other toolkits have...

Then you already knew the answer ...

BTW - which other toolkits can do what you asked, which was ... "How to set window shape by means of a bitmap?"
