kohait00 wrote on Wed, 29 September 2010 08:02i agree on effectiveness and all that.. no doubt.

but there is currently no possibility to have algorithms that can cope with arbitrary data structures. i know that upp is handling much of it using template algorithms in Algo.h, etc. but it's not the same, though speed is an advantage, no doubt.

I guess the main reason is that there is no need for such thing....
