Subject: Re: StreamCypher - A package for stream data cryptography
Posted by mdelfede on Thu, 30 Sep 2010 20:49:13 GMT

Thinking about it... I'll drop a Cypher package into Bazaar on week end, with the basic interface, if we agree about it on these days.
Then I can add my couple of stream cyphers, and you your AES one.
Next we can update the CypherTest package too, allowing to test all the encoder supplied, and we can update the docs.
Finally, I'll remove the StreamCypher package and you your AesEncoder.

What do you think about ?
