## Subject: Re: Scatter : getDrawing    !!!! help !!!!
Posted by Didier on Sat, 02 Oct 2010 20:21:05 GMT

Hi Koldo,

I've been looking in to it this after noon, and there is a bug in Scatter.

The CIRCLE mark seems to malfunction in some circumstances: other marks look good while circle doesn't appear ??.
As far as I've looked, it seems that there are some "magic numbers" in the Scatter ctrl.

Foe example:

```
Drawing Scatter::GetDrawing() const
{
 DrawingDraw ddw(6*GetSize());
 SetDrawing (ddw, 6);
 return ddw;
}
```

What is the '6' value for ???
While in the 'GetImage()' function, there is a scale parameter...

I'll make a test case (some other magic numbers are hanging around I think).

Asta luego
