kohait00 wrote on Wed, 15 September 2010 07:50hi guys

what about having a native interface for OSC (OpenSoundControl), which is gaining importance as well?
it could wastly benefit from Value capabilities of Upp..

In fact, what we would really need is generic interface for sound (we are missing that one so far) and then its specialisation for OpenSoundControl or anything else...

Any contributions in this area are highly welcome!
