Well, perhaps you could test the svn access rights and provide this change (and to reference example too)?

Made the change. moved the code and when I attempted to commit I got in the SVN output:

Deleting   Projects\UppSrc\uppsrc\ScgiServer
Adding   Projects\UppSrc\uppsrc\Web\ScgiServer.cpp
Adding   Projects\UppSrc\uppsrc\Web\ScgiServer.h
Sending   Projects\UppSrc\uppsrc\Web\Web.upp
Sending   Projects\UppSrc\uppsrc\Web\init
Transmitting file data ..svn: Commit failed (details follow):
svn: Access denied

TheIDE then promptly quit on me w/a Windows "stopped working" dialog.
