I have an alpha release of PikaCRM.  
It's my first time to release a software publicly.

View of the customers funtion:

View of the orders funtion:

The database and log will store in user's home directory.  
Windows: C:\Documents and Settings\Application Data\PikaCRM  
Linux: ~/.PikaCRM

Download:  
Windows portable  
Ubunte portable  
All are 32-bit. The Linux version now is only tested on Ubuntu.  
You can find news in PikaCRM website and there are lots of to-do.

Notice: This is a pretest version.
