BTW: in Callback.h:161 is missing the Execute() definition for Gate4<>. here comes with act already placed..

```
template <class P1, class P2, class P3, class P4>
bool Gate4<P1, P2, P3, P4>::Execute(P1 p1, P2 p2, P3 p3, P4 p4) const {
    return (void *)action == (void *)1 ? true : (act && action) ? action->Execute(p1, p2, p3, p4) : false;
}
```
