Novo wrote on Fri, 08 October 2010 18:54 Building of 32 bit apps on Ubuntu64 also requires a "multilib" package with GCC. It is "gcc-4.4-multilib" in my case.

Ah, I've got it already installed.

It would be nice to test on a "clean" ubuntu install to see the complete list of needed packages and make a script to install them.... And maybe to make automatically a GCC32 builder.

My system is so full of installed libs that I really can't be sure of ALL the needed dependencies for 32 bit
