mdelfede wrote on Fri, 08 October 2010 19:44It would be nice to test on a "clean" ubuntu install to see the complete list of needed packages and make a script to install them.... And maybe to make automatically a GCC32 builder.
I can add the GCC32 build method into the amd64 packages. It should be quite simple if you send me the file (GCC32.bmc).
