I'm personally getting different linking issues including not correctly installed libz.so

```
$ ls -l /usr/lib32/libz.so  
lrwxrwxrwx 1 root root 20 2010-10-08 16:04 /usr/lib32/libz.so -> /lib/libz.so.1.2.3.3
```

getlibs is not a miracle after all.
