You're right, I incorrectly described the issue - it's about how an U++ application fills the upper borders of a window.

Very strange. I'm getting this issue on 3 different systems with WindowsXP.

What operating system and version of UPP do you use? Can you upload your recorded video?

P.S. Can you ask the developers, maybe they would look at my post with a description of the issue? I really liked UPP, but a little bit annoying this issue.

P.P.S. I have just tried to record another video, and at first in slow view mode I don't noticed the issue. But when I loaded the video to VirtualDub and watched it frame by frame - I noticed this issue.

Thanks.
