dolik.rce wrote on Thu, 14 October 2010 20:42 To be sure could you try to find out if this effect happens when you open some U++ window on top of any other application?

Yes, it happens too.

Thank you for your comment. Before, I sometimes noticed that the UPP applications are opened on a clean desktop had this issue.

I still hope that a solution must be, because in other frameworks I didn't notice anything like it.
