Subject: How to select a starting directory for the FileSel
Posted by forlano on Sun, 30 Apr 2006 23:30:16 GMT

Hello,

Each time I open a FileSel dialog it starts from the root of my PC. Instead I would like to set the directory from where to start. I used the method BaseDir, for example:

 fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");

In this case it starts from C:\\MyApps\\Vega2\\souceVega but I cannot move back from that level because the button dirup is disabled!
So I tried

  fs.dirup.Enable(); //fs.dirup.Enable(true);
  fs.BaseDir("C:\\MyApps\\Vega2\\souceVega");

with no success. Any idea?

Moreover I would like to get my application directory to supply to FileSel but how can I get it?

Luigi
