porto wrote on Mon, 18 October 2010 16:52I have a problem with selecting data from the DB (Oracle ver. 10.2). The database has a table that contains 14,124 rows. When I try to fetch data with this code:

```
Oracle8 oracle;  
oracle.Open("user/pass@server/db", false));  
Sql sql(oracle);  
sql.Execute("select * from IKIS_ERS.INSUR_ANKT_A");  
while(sql.Fetch())  
Cout() << sql[0] << "\n";  
I get only 345 rows.
```

I fetched from a table more than 1000 rows. it was not problems.  
I will try to fetch more than 10 000 rows to test your problem.

The problem can be:

If you run in terminal with non GUI then in terminal you can view only last 3XX rows.  
Try to put your output in file and count rows.

When I try to select data from the database using the same SQL query with "SQLPlus Worksheet" (its a tool from Oracle), I get 14,600 (why not 14,124 I don't know).

seems your oracle db or client has problems. Check it twice.
