Subject: FNPSA Competition (Spearfishing contests management) Posted by Didier on Wed, 27 Oct 2010 22:19:23 GMT

View Forum Message <> Reply to Message

Hi all,

I've been working for some month now (almost two years) on an app for my favorite soprt: spearfiching.

It allows to:

- * prepare competitions
- * manage competitors and clubs
- * count points and result rankings
- * output well formated result documents using my report generator package

It uses an sql3 db and works fine under linux and windows

It's been used to manage the latest French national championship.

Here are some screen shots.
