Subject: Re: U++ video control to come soon

Hello all

Just an status for your info.

Well, many problems and difficulties..., many.

Control was almost ready but I have had problems with sound decoding impossible to be solved, so I had to change the focus.

Now I work very centered in the ffplay and ffmpeg experience. ffmpeg is simpler but ffplay is complex using SDL threads and timers.

Well, I hope to have the control ready in alpha state this month.
