In order to keep track what's added to the U++ libraries and to avoid confusion for old and new users - the system of U++ new classes, controls (widgets) and their feature requests has been changed (some users have been using it anyway...).

So, if you are sure or unsure if the feature exists, please add at the end of your topic name [FEATURE REQUEST]. Then, later if the feature was added, I'd like to ask the person who added the feature (most likely - Mirek), to edit the topic name by adding [ADDED] and/or [FIXED] or [EXISTS]. U++ version is useful to mention as well!

The same applies to bug reports- add [BUG] or [BUG?]

For big new classes and controls (widgets) there's a separate section now.

Thank you for your understanding!
Comments are welcome!

Aris (fudadmin...)

Edit1:

P.S. Forgotten to mention the main thing:

Please post both: bug reports and feature requests in appropriate forums.

Edit2:

P.P.S. info about old wishlist was deleted.

Also- please, please try to post one (1!) well formulated question per topic!!!
