I can't figure out what the UltimateBook application in bazaar is supposed to do - it asks for html folder and pdf file name. Is this going to make a pdf file out of a bunch of html files? If so, why would I want to?

I also can't figure out the ultimate book project. I've read the tpp topic with the horse picture What is this all about?

I'm hoping the end result is going to be a document that has better index/ contents etc. than a bunch of html links on web pages or the topic++ style.

Graeme
