Subject: Main frame dlg: How to store last dimension and position?
Posted by JoseB on Mon, 08 Nov 2010 09:21:09 GMT

Hi
I would like to store the dimension and position of the main frame dlg in order to open it in the same place with the same dimenson next time.
How to do this?
I know that i have to use files but i am having some dificulties looking for the methods that get windows dimension and position.
Any help would be very appreciated.

Thank you

JoseB
