alex100 wrote on Mon, 08 November 2010 13:09But tell me how i know that window is already opened?

I simply make:

```
MyApp app;
```

```
app.run();
```

```
You can open the window explicitly:MyApp app;
```

```
app.Open();
```

```
//do your customization here
```

```
app.Run(); //now this only starts the event loop for the already opened window
```
