function AsValue skip VT_BOOL
now:

```
  case VT_NULL:  return Null;

  case VT_UI1:   return (int)variant.bVal;
  case VT_I2:    return (int)variant.iVal;
  case VT_I4:    return (int)variant.lVal;
```

may need to add?:

```
  case VT_NULL:  return Null;
      ---->    case VT_BOOL:
  case VT_UI1:   return (int)variant.bVal;
  case VT_I2:    return (int)variant.iVal;
  case VT_I4:    return (int)variant.lVal;
```

in function AsVariant:

now:

```
 case DOUBLE_V:  out.vt = VT_R8; out.dblVal = value; break;
 case STRING_V:
 case WSTRING_V: out.vt = VT_BSTR; out.bstrVal = StringToBSTR(value); break;
 case DATE_V:    out.vt = VT_BSTR; out.bstrVal = WStringToBSTR(value); break;
 case TIME_V:    out.vt = VT_DATE; out.date = ToDATE((Time)value);
```

may properly be as follows:

```
 case DOUBLE_V:  out.vt = VT_R8; out.dblVal = value; break;
 case STRING_V:  out.vt = VT_BSTR; out.bstrVal = StringToBSTR(value); break;
 case WSTRING_V: out.vt = VT_BSTR; out.bstrVal = WStringToBSTR(value); break;
 case DATE_V:
 case TIME_V:    out.vt = VT_DATE; out.date = ToDATE((Time)value);
```
