The only problem you might encounter is actually how to draw the dotted line, if I remember correctly there is no simple function to draw a line with pattern using Draw. So you will probably have to draw the dots somehow yourself.

There is Draw::DrawLine. 5-th argument may be PEN\_SOLID, PEN\_DASH, PEN\_DOT, PEN\_DASHDOT, PEN\_DASHDOTDOT if you want to have different kind of lines.

Andrei

Hello Andrei

Those includes only work if Painter is used. If not use a negative color and width == 1 to get a dashed line.
