Hi Neil,

Good to hear you got it working even with this simple approach

nneilson wrote on Thu, 18 November 2010 10:15 "for(*q;q++)" is a bit new for me. for(;;) until break I understand. If I debugged some code it would become apparent. I've learned this from U++ sources. It seems bit weird at first, but it is quite handy once you get used to it and understand the principle. Basically it uses just the fact that *x + n is the same as x[n], only in slightly different syntax

Honza
