koldo wrote on Thu, 22 April 2010 18:44Hello all

Now the packages can have files or Topic folders.

By my mistake I have put few times a folder instead of a file and trying to delete it all the folder has been deleted

BTW, how have you achieved to put a folder to package? Well, perhaps by editing the .upp, or deleting file and putting a folder with the same name...?

The only folder possible there by theide is AFAIK topic group...
