kohait00 wrote on Thu, 09 December 2010 01:03 thanks, i'll try
EDIT: question remains: am i using the dynamic_cast in the way you thought it?

Yes.

I would perhaps rather use simple ifs to test for property name instead of map of callbacks.

BTW, after more thinking, maybe:

```
PROPERTY(EditInt, "min", if(IsNumber(param)) MinMax(param, o.GetMax()), GetMin())
```
