Hello JoseB

I do not know what to answer you .

- You have XP or newer windows
- You have "c:\upp\mingw\include\winpool.h"
- And you have in your source:  
#include "c:\upp\mingw\include\winpool.h"  
or  
#include <winpool.h>

I do not understand the compiler error:  
C:\upp\MyApps\kk\main.cpp:21: error: 'GetDefaultPrinterA' was not declared in this scope

If you want, open a "TeamViewer" session for me to see in my browser your Desktop. It is like VNC but simple to install and immune to firewalls and proxies.
