Subject: Re: error C2110: '+' : cannot add two pointers
Posted by nlneilson on Sun, 02 Jan 2011 08:31:35 GMT

I don't recall using any of the three examples.
Most of my experience with C++ was more than 15 years ago, just getting back into it in the last year.

In Java I don't think this is a problem.

In Python switching from 2.xx to 3.xx ran into something:
OKCom = OKCom + [ser.portstr + ' ' + str(Baud[b]) + ' OK']
In 2.xx
+ Baud[b] + worked
but 3.xx requires
+ str(Baud[b]) +

It looks like I have additional reading/research to do.

Thanks

Neil
