mirek wrote on Tue, 04 January 2011 13:22 Well, I guess is is about the time to improve looks...

WRT to icons, I guess we should use some free sets. The question is whether we should aim for configurable? (I mean, allow more sets of icons). I think it would not hurt and is relitevely easy to do.

Sure and this should not be only possible for toolbar but also for assist, designer etc.
