Following the example of "RepGen", I have created two packages:

- RepDesigner, (based on UWord), for create the report template files;
- MyReport, that is a package for generate the report, including RepGen engine.

Simple example in the code:

```
#include <MyReport/MyReport.h>
```

```
RepGen rep;  
rep.SetTemplate("filename"); // the template file.  
tep.Perform();
```
