Ok,

I have finished with tabbing and more flexible docking mechanism.

## Remain to finish:

- 1. to Make nested docking for left, top, right, bottom docking, not only tabbed nested docking;
- 2. To make possibility for tabbing nested tabs not only bottom (left, top and right).
- 3. to Save and restore settings;
- 4. TO finish with highlight effect. (optional).
- 5. to optimize the code.

I will share the code when the code will be finished.
