## Subject: Is it possible to set the Font type for the arrayctrl? Posted by forlano on Sat, 06 May 2006 12:56:27 GMT

Hello,

how can be seen in the following picture the numbers are not aligned vertically although each row has been formatted and contains always the same numbers of chars.

If I could use the Courier font the problem would disappear. Unfortunately I was not able (I used even Navigate...) to found something useful to set the font and maybe the color.

A workaround is to use label inside each cell. Another is to assign a new column to the number but I do not like the vertical line between the name and the number.

Luigi
