```
if(active) wnd->SetWndForeground();
```

work for you?

error: active is not declared

blind try - this works:

```
if(focusCtrl) focusCtrl->SetWndForeground();
```

I believe it should have been

```
if(activate) wnd->SetWndForeground();
```

At least that is what I did and it helped.

Honza

Did it? It's a great news then
